

MELGITH PAULOSE

☎ 6282273149 | ✉ melgithpaulose@gmail.com | 🐙 github.com/melgithpaulose | 🔗 linkedin.com/in/melgithpaulose

Technical Skill

Programming Languages : Java , C++ , JavaScript

Frameworks & Libraries : Angular , Spring Boot , Spring , JDBC , Hibernate , Servlet , JSP , JQuery , Bootstrap

Databases : MySQL , MongoDB

Tools & IDEs : VS Code , MySQL Workbench , Eclipse , GitHub

Experience

Quest Innovative Solutions

Trainee

June 2025 – Present

- Developed a **Spring Boot School Management System** following MVC architecture with separate Teacher and Student modules; implemented RESTful APIs with full CRUD operations (POST, GET, PUT, DELETE) and tested using Postman.
- Built a **Spring MVC web application** with a form-based interface to collect user data and persist it in a MySQL database.
- Designed and developed a **Java Web Application** using JSP, Servlet, JDBC, and MySQL with user registration and login authentication features.
- Created a **JDBC-based Console Application** to perform CRUD operations, demonstrating strong database integration skills.
- Developed a **Responsive Bootstrap Website** using navigation bars, cards, containers, and structured layouts.
- Implemented a **Dark/Light Mode feature** using jQuery to enhance UI interactivity.
- Built multiple **JavaScript-based applications**, including an interactive calculator, quiz website with notification features, and a temperature control program.
- Designed static web pages using **HTML & CSS**, including a Facebook login clone, timetable layout, and structured listing pages.

PROJECTS

IPL Match Outcome Prediction with Machine Learning

The IPL Match Outcome Prediction with Machine Learning project uses historical IPL data to build predictive models for forecasting match outcomes. Leveraging Random Forest, TensorFlow, and Keras, the system continuously improves predictions by integrating real-time data and optimizing model performance.

- **Data Analysis & Feature Engineering:** Experienced in gathering and analyzing IPL data using Python (Pandas, NumPy) for data cleaning, feature extraction, and statistical analysis to identify key performance indicators (KPIs).
- **Machine Learning Model Development:** Applied Random Forest Algorithm using Scikit-learn to build predictive models, training the system on historical match data, player statistics, and team dynamics.
- **Scalability & Real-Time Integration:** Developed models with scalability in mind, utilizing TensorFlow and Keras to integrate real-time data for continuous improvement of match predictions.
- **Model Evaluation and Optimization:** Evaluated model performance using metrics like accuracy, precision, and recall, and fine-tuned the Random Forest model using GridSearchCV to optimize hyperparameters for better prediction accuracy.

eTutor

The eTutor System is a web platform where students can select mentors and access study materials. Developed using PHP and WAMP Server, it allows seamless communication and resource sharing between students and mentors.

- **Database Management (MySQL):** Integrated MySQL for efficient data storage, managing student and mentor profiles, course materials, downloads, and interaction logs, ensuring data integrity and scalability.
- **User Interface with HTML, CSS, and JavaScript:** Developed a responsive front-end using HTML, CSS, and JavaScript, ensuring a user-friendly interface for students and mentors to easily navigate, select mentors, and download resources.
- **WAMP Server for Local Development:** Used WAMP Server (Windows, Apache, MySQL, PHP) as the development environment, allowing seamless testing and deployment of the application locally before production, ensuring optimal performance and scalability.

Education

- **FISAT (Federal Institute of Science and Technology).** **Angamaly, Kerala**
Master of Computer Application (2022 – 2024)
- **BPC (Baselios Paulose II Catholicos College).** **Piravom, Kerala**
Bachelor of Computer application (2019 – 2022)

Certification

- **Introduction to C Programming.**
NPTEL(2023)
- **Cloud Computing.**
NPTEL(2024)
- **MERN Stack Bootcamp.**
Logix Space Technology(2024)
- **Introduction to Software Testing**
Udemy(2025)
