Professional Summary

Computer Science and Engineering graduate with skills in coding and problem-solving. Quick learner with a strong interest in practical, hands-on development work, seeking an opportunity to apply my knowledge and grow in a team environment.

SKILLS

Technical Skills:

- **Programming Languages:** Java, C++, JavaScript
- **Core Concepts:** OOP, Data Structures, Algorithms, Database Management, Exception Handling
- **Web Technologies:** HTML, CSS
- **Frameworks & Libraries:** Spring Boot, Spring, JDBC, Hibernate, Servlet, JSP, JQuery, Bootstrap
- **Databases:** MySQL
- **Tools & IDEs:** VS Code, MySQL Workbench, Eclipse, GitHub

Soft Skills:

- Problem Solving, Team Collaboration, Adaptability, Time Management

Experience

Quest Innovative Solutions

Trainee

June 2025 – Present

- Developed a **Spring Boot** application for a **School Management System** implementing **MVC architecture** with distinct **Teacher** and **Student** modules; built REST controllers with full **CRUD operations** tested via **Postman** using **POST, GET, PUT, DELETE** methods
- Developed a **Spring MVC** web application featuring a **form-based interface** to collect user details and **persist data** into a **database**
- Developed a **Java** web application using **JSP, Servlet, JDBC, and MySQL** following **MVC** architecture, featuring user registration and login authentication
- Developed a **JDBC-based Console Application** to perform **CRUD** operations, demonstrating strong understanding of **Java** and **database integration**
- Built a **Responsive Bootstrap Website** using navigation bars, cards, containers, and structured layouts
- Designed a **jQuery-based Dark/Light Mode Webpage** improving UI interactivity
- Built multiple **JavaScript-based** websites, including an interactive calculator, a quiz website with notification features, and a simple temperature control program
- Crafted **HTML & CSS** static pages, such as a Facebook login clone, timetable layout, and structured listing pages

IBAND Technologies

Kochi, Kerala

Mobile App Development Intern

Jan 2022 – Feb 2022

- Gained practical experience in **mobile application development** using modern technologies
- Contributed to development of **cross-platform mobile applications**
- Assisted in **UI/UX** design implementation and feature development for real-world projects

Projects

Employee Management System

2025

- Developed a **Console Application** using **Java** and **JDBC** to perform **CRUD operations** on employee data
- Designed and implemented **relational database schema** using **MySQL** for efficient data management
- Technologies used to build **Java, JDBC, MySQL**

Infant Cry Language Analysis and Recognition App

2023-2024

- Built **mobile application** using **Machine Learning** to classify infant cry patterns and identify needs
- Analyzed **audio features** to detect hunger, discomfort, pain, or tiredness
- Technologies used to build **Machine Learning, Python, Mobile Development**

Face Recognition System using OpenCV

2023

- Developed **real-time face detection and recognition system** for automated attendance marking using **OpenCV** and **Python**
- Implemented feature to distinguish between known and unknown individuals with **timestamping**
- Technologies used to build **OpenCV, Python**

Education

APJ Abdul Kalam Technological University <i>B.Tech in Computer Science & Engineering — CGPA: 7.54/10.0</i> - Toms College of Engineering - Relevant Coursework: Data Structures, Algorithms, Database Management	Kottayam, Kerala 2020 – 2024
Jawahar Navodaya Vidyalaya <i>Plus Two - CBSE — Percentage: 82%</i> Computer Science Stream - Focus on Mathematics and Computer Science fundamentals	Mahe, Kerala 2019 – 2020
Jawahar Navodaya Vidyalaya <i>Class 10 - CBSE — Percentage: 70%</i> General Stream - Focus on Mathematics, Science	Kozhikode, Kerala 2017 – 2018

Achievements

- Published a research paper in International Research Journal of Engineering and Technology (IRJET) for Face Recognition System
- Completed multiple hands-on development projects during training, showcasing practical problem-solving abilities
- Built a Machine-Learning-based Infant Cry Recognition App for real-time classification of infant needs
- Organized and coordinated various sports and games events as a student volunteer

Interests

- Exploring front-end development and UI design concepts
- Playing football and following major leagues
- Engaging in logic-based problem-solving activities
- Reading graphic novels and literature
