

Profile Summary

Proficient Django Backend Developer with 1+ years of experience in Django architecture design, Django REST Framework (DRF), and RESTful API development. Expertise in database schema design, API documentation, and PostgreSQL optimization. Experienced with Git, ERP/Odoo workflows, and Wix; beginner-level AWS DevOps. Dedicated to building scalable, efficient, and maintainable backend systems.

Core Components

- Django | Django REST Framework (DRF) | Django Architecture | Database Schema Design
- PostgreSQL Optimization | Redis Caching | Elasticsearch Search | Celery Queues
- RESTful APIs | JWT Authentication | RBAC | Swagger/OpenAPI Documentation
- Git/GitHub | ERP/Odoo Workflow Integration | AWS S3/EC2 (Beginner) | Gunicorn/Whitenoise
- Agile/Scrum | Sprint Planning | Postman Collections | Linux | CI/CD Basics | WIX | UI Design

Work Experience

Divergent Catalist Private Limited, Kochi, Kerala - Django Developer

2024-Present

- Developed and deployed a Django-based product from scratch, managing full architecture for scalable backend systems aligned with ERP workflows
- Engineered 50+ RESTful APIs using DRF for seamless frontend-backend communication, reducing integration time by 40%
- Architected modular backend systems supporting business logic, handling 10,000+ daily requests with 99.9% uptime
- Collaborated on 12 agile sprint cycles, contributing to planning, testing, and documentation while resolving 95% of complex bugs within 24 hours
- Explored and integrated new technologies, enhancing development efficiency by 30% through Redis caching and Celery background tasks

Projects

Labaiq – Multi-Commerce & Listing Platform

Next-generation marketplace connecting businesses via unified digital listings for services, properties, jobs, events, and products; supports free/premium tiers for 18,000+ users

Key Responsibilities

- Architected overall Django project structure ensuring modular scalability and separation of concerns, supporting 350,000+ listings
- Built and optimized 50+ RESTful APIs with DRF for listings, JWT authentication, business profiles, RFQs, billing cycles, and category management
- Modeled PostgreSQL relational schemas with indexing strategies, reducing query times by 60% across 2M+ records
- Integrated Redis for caching/background tasks and Celery queues, improving concurrency for 3,000+ peak users
- Deployed Elasticsearch for full-text search/filtering capabilities, achieving sub-100ms response times

- Authored API sheets, Swagger documentation, and Postman collections, enabling 100% frontend collaboration coverage
- Configured AWS S3 for static/media storage and .env management, preparing production environments
- Coordinated with clients on requirement gathering and sprint planning, delivering features 15% ahead of schedule
- Supported deployment using Gunicorn, Whitenoise, and AWS services for staging/production
- Applied Git/GitHub branching for code versioning, reviews, and CI/CD integrations

Chemical Daddy – Multi-Commerce & Listing Platform

Specialized platform for chemical industry connecting buyers/sellers via secure listings, leads, real-time chat, and CAS-based search; scalable subscription tiers

Key Responsibilities

- Developed real-time multi-user chat system with threaded replies, file attachments (up to 25MB), and audit logging, processing 15,000+ daily messages
- Revamped database schemas with validation and indexing, enforcing high performance for 50,000+ chemical compounds
- Implemented JWT authentication, GDPR-aligned data handling, secure logging, and WCAG-friendly API responses
- Prepared API documentation, functional flows, and coordinated with stakeholders for feature refinement, reducing revisions by 25%
- Led client collaborations for requirement gathering, documentation, and sprint planning, ensuring on-time deliverables
- Assisted in deployment setup using Gunicorn, Whitenoise, and AWS for staging/production environments
- Utilized Git/GitHub strategies for code versioning, reviews, and CI/CD integrations
- Architected scalable Django backend with granular RBAC for Super Admins, sellers, buyers, and admins

Education

Federal Institute of Science And Technology

2022-2024

Master of Computer Applications

St. Mary's College of Commerce and Management Studies - Thuruthiply

2017-2020

Bachelor of Computer Applications (BCA)
